Programming I
Overview of C++ - Basic Elements
Program #1 – Nameblock

You are to type in the **nameblock.cpp** program given. You should type it in as is except you are to change:

<yourname> to your actual name
<your section> to your actual section
<assignment due date> to the actual due date

Run the program using your personal information. You must turn in a printout of the typescript file you created through the use of script. Remember, you must include in the typescript file a copy of the program, the compile line, and the program output. Remember that programs are due at or before the beginning of class!
